Applications, Vol. 98, No. 2

INT. PATENT CLASSIF.:

MAIN: (6) H01G009-02

ABSTRACT:

PURPOSE: TO BE SOLVED: To provide an electrical double-layer capacitor having a low internal resistance which does not increase much and a capacitance which does not drop much when, the temperature of the capacitor becomes higher.

CONSTITUTION: n electrical double-layer capacitor utilizing an electrical double layer formed at the boundary between a pair of polarizable electrodes 1 and 2 and a nonaqueous electrolytic solution, a separator 5 positioned between the electrodes 1 and 2 is formed of a porous resin sheet, carrying a fluorine- containing polymer ion exchange resin and an electrically insulating inorganic compound.
